

## CONTENTS

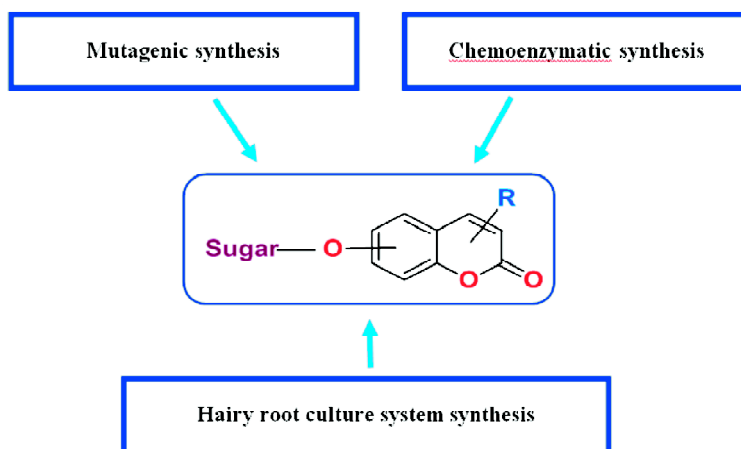

### Natural and synthetic glycosylated chalcones as promising bioactive compounds

Mannem Rajeswara Reddy and Indrapal Singh Aiden  
pp. 109-115

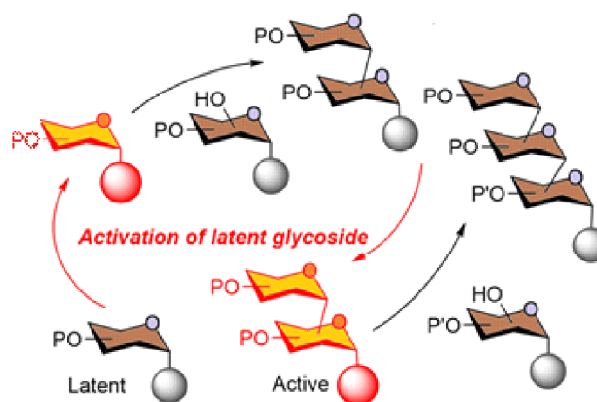

### Biochemical synthesis of coumarin glycosides: A review

Jyotirmoy Maity, Smriti Srivastava, Rhea Rana,  
Bhawani Shankar, Neena Khanna and Ashok K.  
Prasad  
pp. 117-134

### Aspects of chemical transglycosylations in modern glycoside synthesis

Anupama Das and N. Jayaraman  
pp. 135-156

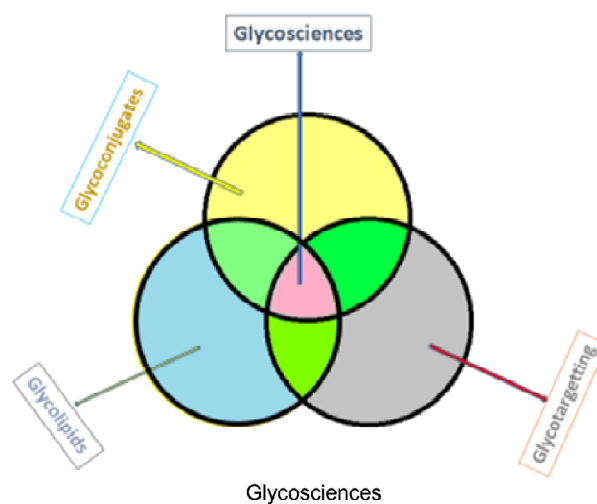

---

## A simple perspective of glycosciences

Bhavya P. V., Rabecca Jenifer Vasanthan, Yaqoob Ahmad and Thangamuthu Mohan Das

pp. 157-176

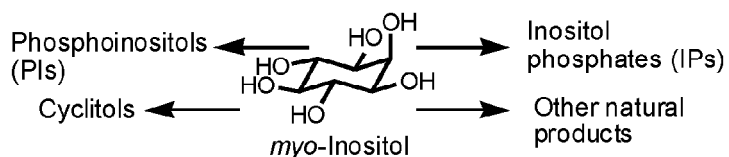

---

## Potential of *myo*-inositol as a starting material for natural product synthesis

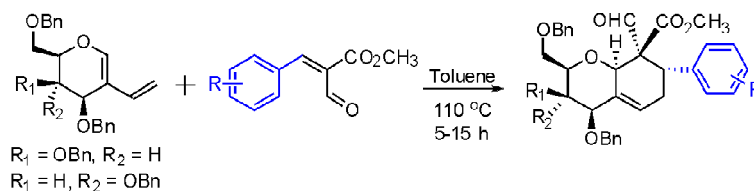

Mysore S. Shashidhar and Nivedita T. Patil

pp. 177-185

---

## Stereoselective synthesis of sugar-fused C-aryl-carbasugar derivatives from sugar-derived terminally unsubstituted dienes and Baylis-Hillman product-derived trisubstituted olefins via Diels-Alder reaction

Kadigachalam Parasuraman, Sateesh Dubbu, Ande Chennaiah, A. K. Ibrahim Sheriff and Yashwant D. Vankar

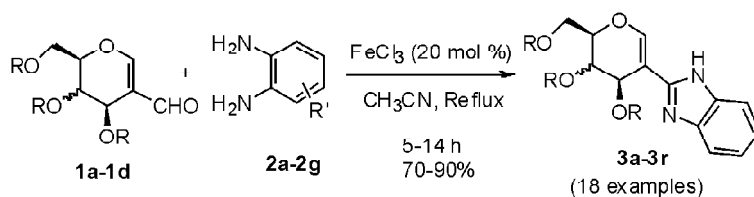

pp. 187-196

---

### FeCl<sub>3</sub> catalyzed tandem synthesis of optically pure sugar based benzimidazoles

Sarita Mishra, Soumik Roy, Rina Ghosh, Diganta Dey and Banasri Hazra

pp. 197-211

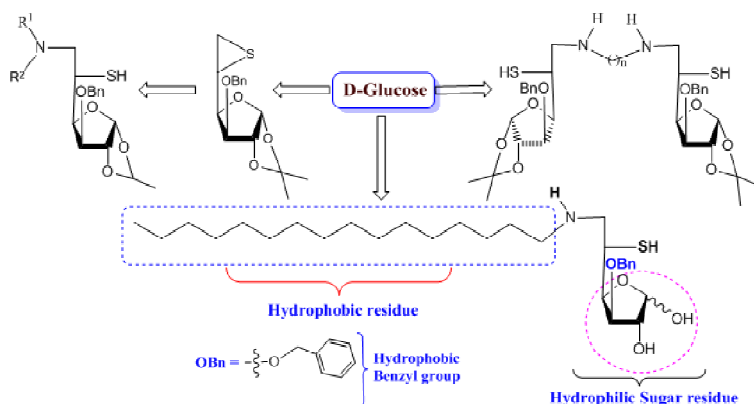

---

### Synthesis of glycosylated aminothiols from D-glucose as promising anti-tubercular agent

Archana Singh, Virendra Prasad, Sanchayita Rajkhowa, Vishwa D. Tripathi and Vinod K. Tiwari

pp. 213-225

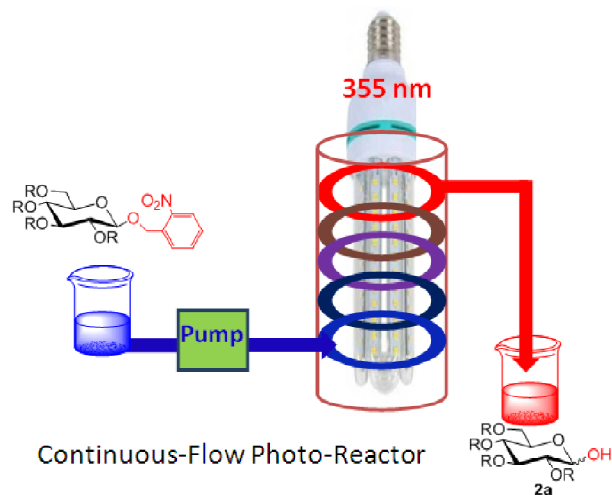

---

### Synthesis of photolabile group protected anomeric acetals and its application in carbohydrate synthesis with the assistance of continuous flow photo-reactor

Varsha Tiwari, Vishnu Nayak Badavath, Adesh Kumar Singh and Jeyakumar Kandasamy

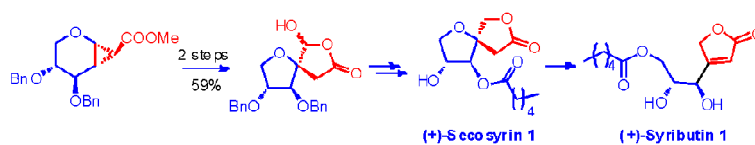

pp. 227-236

---

**A concise and efficient approach to the stereo-selective total synthesis of (+)-secosyrin 1 and (+)-syributin 1**

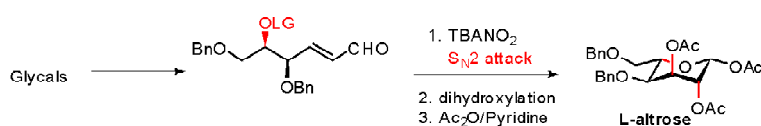

Perali Ramu Sridhar and Boddu Umamaheswara Rao  
pp. 237-242

---

**Three-step synthesis of protected L-altrose from D-galactose derived Perlin aldehyde**

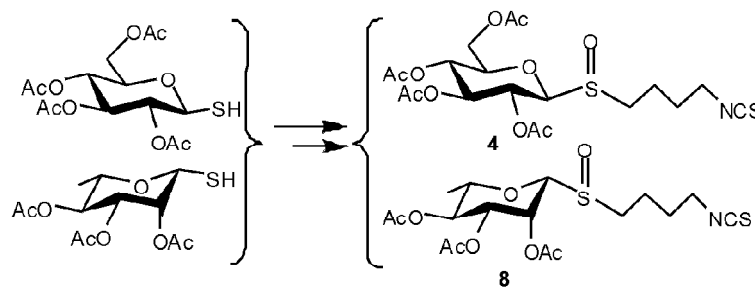

Suwendu Halder, Rupa Bai Addanki and Pavan K. Kancharla  
pp. 243-250

---

**Convenient synthesis of glycosylsulforaphane derivatives**

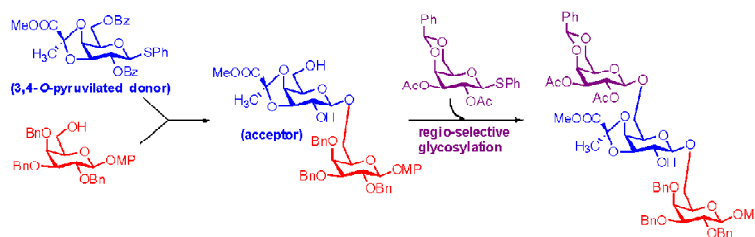

Arin Guichait and Anup Kumar Misra  
pp. 251-254

---

**Studies towards the total synthesis of repeating unit of O-sulfated polysaccharide from marine bacterium *Cobetia pacifica* KMM 3878**

Kabita Pradhan, Ananda Rao Podilapu and Suvam S. Kulkarni  
pp. 255-264

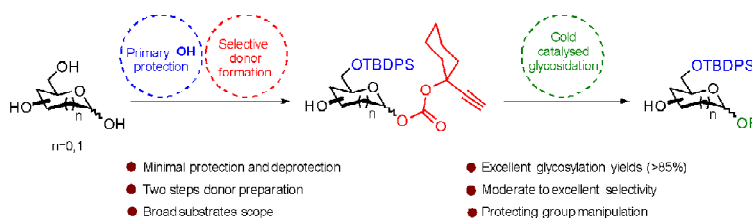

---

**Minimal protection based glycosidation (MPG)  
reaction employing synergistic action of [Au]/[Ag]-  
catalytic system**

Harsha Gouda, Bijoyananda Mishra and Srinivas  
Hotha

pp. 265-270

---

**Synthesis of enantiopure, densely functionalized  
carbocycles from vinyl nitro-modified carbohy-  
drates**

Chinmoy Manna and Tanmaya Pathak

pp. 271-276
