

Accounts of Chemical Education and Research

VOLUME 1

No. 1

MAY 2022

CONTENTS

01. Need to redesign chemistry education in India for the 21st century learning needs	1
A. K. Bakhshi, Vimal Rarh	
02. Multitude of elementary chemical reactions between the first two elements in the periodic table: Topic for pedagogic discussion and contemporary research	5
N. Sathyamurthy	
03. Colloid stability and Schulze – Hardy rule: Its origin and new inputs	9
Animesh Kumar Rakshit, Bappaditya Naskar, Satya Priya Moulik	
04. Fundamentals of NMR spectroscopy	17
Ramakrishna V. Hosur	
05. Alkali-containing molecular ions in Secondary Ion Mass Spectrometry (SIMS): An innovative technique for chemical analysis of quantum structures	25
Purushottam Chakraborty	
06. Photochromic liquid crystal (PLC) : A brief history of 1-Alkyl-2-(arylo)imidazoles	49
Chittaranjan Sinha	
07. Preliminary understanding of experiments on single crystal X-ray crystallography	63
Yogesh Dhasmana, Deepak Chopra	
08. A path of Quantum Mechanics from classical mechanics: An elegant way of introducing Quantum Mechanics	71
Dulal C. Mukherjee
